Full-stack developer and Computer Science Honors student skilled in building distributed microservices, Python FastAPI backends, and modern React user interfaces. Demonstrated expertise in database migrations, AI endpoint integrations, and automated workflow solutions.

EDUCATION

Texas Tech University, Honors College

Bachelor of Science in Computer Science, Minor in Mathematics

May 2027

GPA: 3.96/4.0

Honors: President's Honors List (4 Semesters), Dean's List, Terry G Myers Scholarship

PROFESSIONAL EXPERIENCE

Automation Intern, CtrlS Datacenters

July - August 2026

- Engineered a 3D visualization CMDB platform for enterprise datacenters, enabling seamless site-to-VM navigation.
- Architected a centralized Material Management System (MMS) to streamline internal inventory control and procurement workflows.
- Executed large-scale database migrations from MySQL to PostgreSQL to optimize data retrieval and maximize system reliability.
- Implemented multi-tenant Role-Based Access Control (RBAC) security models leveraging PostgreSQL and MongoDB.

Grading Assistant (Data Structures), Texas Tech University

September 2025 - January 2026

- Evaluated technical code submissions for over 180 students across 6 sections to enforce software engineering best practices.
- Analyzed student algorithms for runtime efficiency, memory usage, and edge-case handling across complex data structures.

TECHNICAL PROJECTS

Codet - AI Job Prep & Application Copilot

React 18, Node.js, Express.js, Python, FastAPI, MongoDB Atlas, Playwright, Gemini API

- Architected a distributed microservices platform integrating a React 18 frontend, Node.js core, and Python FastAPI microservices.
- Automated background browser operations with Playwright and Manifest V3 Chrome Extension to expedite workflow automation.
- Integrated Google Gemini API and PyPDF2 parsing algorithms to perform real-time ATS optimization and document analysis.

Proibe - Productivity & Note-Taking Workspace

Next.js, Firebase, Google Gemini API, JavaScript, Tailwind CSS

- Built a full-stack web application featuring a dynamic block-based editor with responsive drag-and-drop mechanics.
- Integrated Google Gemini models to generate instant, contextual summaries of long-form clinical and creative notes.

Reinforcement Learning PPO Algorithms

Python, PyTorch, Gymnasium, NumPy, Matplotlib

- Implemented Proximal Policy Optimization (PPO) algorithms using PyTorch and Gymnasium for continuous control tasks.
- Engineered ensemble critics and recurrent GRU networks to reduce state-value overestimation bias in partially observable environments.

AWARDS & CERTIFICATIONS

- Terry G Myers Scholarship for Academic Year 2025-26
- Second Place in Code Jam (Mini Hackathon), Dec 2023
- GDG Club: UI/UX Certification, Web development Certification, Dec 2023

SKILLS

Languages: Python, TypeScript, JavaScript, SQL, C, C#, HTML/CSS

Frameworks: React 18, Next.js, Node.js, Express.js, FastAPI, PyTorch, Tailwind CSS

Databases: PostgreSQL, MongoDB Atlas, MySQL, Firebase, Firestore

Tools: Playwright, Chrome Extension API (Manifest V3), Git, Linux, Gemini API, PyPDF2, Figma
